

ST IVES SCHOOL ALUMNI

“

Danny Worrall

Fugro Geo-Services

What was your favourite subject at school and why?

I enjoyed DT the most because I think my old teacher Mr Smith recognised that I had a bit of a talent for drawing.

He made sure that I was challenged with work and supported my Ideas and often went out of his way to inspire the creative mind I had.

I made models, designed board game covers, learned new ways of drawing in two and single point perspective. From memory a long time ago I also designed and made broaches, turned a wooden lamp, even designed and manufactured shin pads as part of course work.

I was also quite poor at writing, so think it was a subject I could relax in. The fundamental way of communicating via a drawing is something that comes naturally to me and I do this everyday...

What has been your greatest achievement in life and how did your experience at St Ives School help you to achieve other successes?

Mobilising the VBM3000 drill for offshore wind farms, my time at school and what I learnt is still being used on a daily basis especially maths and the technical drawing I learnt.

What one piece of advice would you give to current students?

Work hard, be honest, be punctual and most import be humble with success.

What is your next big goal?

Becoming a director or moving into another senior position.
